

SENIOR AZURE ENGINEER

SALARY: >£70,000

LOCATION: REMOTE

HOURS: 37.5 PER WEEK

SENIOR AZURE ENGINEER

The Role Description

We are looking for a highly skilled and motivated individual to join our team to provide exceptional service for our client who is forward thinking and has adopted a cloud first approach to their business. Using the latest Microsoft Azure technology as a Senior Azure Engineer you will be responsible for developing, supporting and maintaining our client's infrastructure as code cloud infrastructure.

You will be creating and maintaining existing CI/CD pipelines using Azure DevOps and ARM templates to build, deploy and test the software, documenting as you go, so that the team are able to take ownership of the pipelines going forward. All Azure DevOps Engineer applicants must be experienced in Azure DevOps yaml pipelines, ARM, CI/CD, creating technical documentation and various Azure components.

Specific role requirements and experience:

- ARM / JSON
- YAML Pipelines and Classic Pipelines
- Powershell
- Azure DevOps administration
- Troubleshooting and problem solving

Essential Criteria

- Must hold or be able to successfully achieve and maintain NPPV3 with SC.
- Able to evidence excellent customer service skills
- Strong knowledge of Azure
- A background utilising DevOps practices to enable Continuous Delivery
- Strong automation/ scripting skills
- Collaborative skills - being open to pair programming and working closely with Developers in cross functional teams.
- Scripting language or coding experience (Including Powershell).
- Proven ability to design and support robust build, deployment, and configuration management systems for infrastructure as code particularly with ARM
- Solid understanding of networking concepts, technologies, and protocols (TCP/IP, IPSec, HTTP, FTP, DHCP, and DNS).
- Relevant Microsoft Certifications.
- Designing and implementing new DevOps pipelines and release pipelines to meet strict security requirements
- Working knowledge of management groups, the cloud adoption framework and Azure networking resources.
- Experience working alongside development teams to deliver PaaS services in the cloud alongside codebases.

SFIA

At risual we use the Skills Framework for the Information Age as our skills framework. This is made up of 7 levels of responsibility and more than 100 individual skills. More information can be found here. This role is expected to be a SFIA Level of Responsibility [4].
